

SARAVANAKUMAR V

Python Developer

+91 8778226217 | saravanakumarmca2k18@gmail.com | [LinkedIn](#) | [GitHub](#) | Madurai, Tamil Nadu

PROFESSIONAL SUMMARY

Results-driven Python Developer with hands-on experience in building scalable and secure server-side applications using **Core Python, Django, and Django REST Framework**. Strong foundation in **object-oriented programming (OOP)**, **RESTful API development**, and **secure authentication & authorization mechanisms, including JWT (JSON Web Token) and role-based access control (RBAC)**. Proficient in **database design and management using PostgreSQL and SQLite**, with experience in writing optimized queries and handling data efficiently. Skilled in **API integration, debugging, and backend performance optimization**, including pagination and web scraping. Familiar with **Docker for containerization and Git-based version control (GitHub)**, enabling efficient development and deployment workflows. Committed to developing **clean, maintainable, and well-documented code**, with strong problem-solving abilities and a collaborative team mindset.

TECHNICAL SKILLS

Languages: Python 3x

Frameworks: Django, Django REST Framework (DRF), FastAPI

Databases: PostgreSQL, MySQL, SQLite3

Frontend: HTML, CSS

Tools: Docker, GitHub, Postman

Core Concepts: REST APIs, CRUD, JWT Authentication & Authorization, RBAC, Web Scraping, Task Scheduling, Pagination, Unit Testing

PROJECTS

E-Blog Platform | Tech Stack: Django, SQLite3, HTML, CSS

- **Designed and developed a Django-based web application with role-based access control (RBAC)**, implementing distinct user roles (Admin, Creator, Reader) to ensure secure and structured content management.
- **Implemented server-side authorization using Django permission** preventing unauthorized access and ensuring backend security beyond UI-level restrictions.
- **Built full CRUD functionality for content management**, enabling creators to draft, publish, update, and delete posts efficiently.
- **Developed a scalable and optimized database structure using Django ORM**, managing relationships between users, roles, and content for efficient data retrieval.
- **Enhanced application security by enforcing role-based permissions**, ensuring data integrity and controlled access to critical functionalities.
- **Created a responsive and user-friendly interface using HTML and CSS**, dynamically rendering UI elements based on user roles.
- **Debugged and resolved application issues**, ensuring smooth functionality and better user experience.

Job Portal API | Tech Stack: Python, Django REST Framework (DRF), PostgreSQL, JWT, Docker

- **Designed and developed RESTful APIs** using Django REST Framework, enabling seamless interaction between job seekers and recruiters.
- **Implemented custom user model using Abstract User with role-based access control**, supporting Job Seeker and Recruiter functionalities with secure permissions.
- **Built end-to-end job management system**, allowing recruiters to create, update, and delete job postings with proper authentication and authorization.
- **Developed job application module with status tracking**, enabling recruiters to manage candidate applications efficiently.
- **Integrated JWT-based authentication for secure login and API access**, ensuring stateless and scalable session management.
- **Handled file uploads for resume management**, enabling job seekers to upload and manage documents securely.
- **Designed and optimized relational database schema using PostgreSQL**, ensuring efficient data storage and retrieval.
- **Tested and validated APIs using Postman**, ensuring reliability, error handling, and proper request-response cycles.
- **Containerized the application using Docker (basics)** to support consistent development and deployment environments.

INTERNSHIP EXPERIENCE

Python Developer Intern | **Neo Talent**

January 2026 – Present

- Built web scraping pipelines using Selenium and BeautifulSoup — developed a Flipkart scraper to handle dynamic content and a Scrape This Site project to extract structured static web data.
- Worked extensively with MySQL, writing complex joins and subqueries for data handling, cleaning, and analysis tasks.
- Integrated APIs using a JSON server and handled JSON data for application-level operations; implemented decorators and generators to improve code efficiency.
- Applied modular, class-based design patterns across projects to build reusable and maintainable components.
- Generated data visualizations to represent processed datasets clearly and communicate insights effectively.

Python Development Intern | **Cognifyz Technologies**

January 2026 – February 2026

- Developed a command-line calculator, palindrome checker, and number guessing game using modular, class-based architecture for clean code organization.
- Built a password strength checker with structured validation rules and a file organizer script that categorizes files by extension using reusable class design.
- Produced data visualization reports by separating data processing and plotting logic into distinct, reusable components.

Python Development Intern | **Techno Hacks Solutions Pvt. Ltd**

November 2025 – December 2025

- Built Python applications including a to-do list, contact book, expense tracker, and quiz system using class-based architecture for modularity and maintainability.
- Developed a weather application by integrating third-party APIs and organizing response handling in structured components.
- Implemented a BeautifulSoup web scraper with a clean separation between data extraction and processing logic.

WORK EXPERIENCE

Freelance Web Designer | **Self-Employed**

March 2019 – February 2022

- Designed and delivered responsive websites for diverse clients using HTML and CSS, managing full project cycles from requirements gathering to deployment.

Sales Officer | **Ranjitham Jewellers, Madurai**

June 2022 – December 2024

- Developed strong communication, client-handling, and requirement analysis skills directly transferable to stakeholder collaboration and Agile software development workflows.

EDUCATION

Master of Computer Applications

CGPA: 7.6

P.S.N.A College of Engineering and Technology, Dindigul, Tamil Nadu | Graduated June 2018

Bachelor of Science in Computer Science

CGPA: 7.7

S. Vellaichamy Nadar College, Madurai, Tamil Nadu | Graduated October 2014

CERTIFICATIONS & ACHIEVEMENTS

- Advanced Python with Django – Certification (Issued by FITA)
- Runner Up – Technical Quiz Competition, Vellalar Engineering College, Erode
